MACHINE LEARNING ENGINEER

Mohammed Vasi Khan

vk64375@gmail.com github.com/vasi2904k linkedin.com/in/mohammed-vasi-khan

EXPERIENCE

BRM Executive
Mar 2026 - Present

Gozoop Group (Client: Club Mahindra) | Remote

Manage Brand Reputation Management (BRM) for Club Mahindra by monitoring online sentiment across social media platforms. Proactively engage with customers to resolve queries, escalating critical issues to ensure high customer satisfaction. Analyze customer feedback trends and provide actionable insights to improve brand perception.

Machine Learning Engineer (Internship)
Mar 2026 - Present

Codmek Softech | Jaipur, Rajasthan, India (Remote)

Develop and deploy machine learning models using Python and data analysis techniques. Collaborate with the engineering team to optimize data pipelines and improve model accuracy. Contribute to real-world AI projects and implement data-driven solutions.

Remote Assistant Specialist
Jan 2026 - Feb 2026

TaskUs (Client: Starship Technologies) | Indore, Madhya Pradesh, India (On-site)

Supported operations for autonomous delivery systems under the Starship Technologies project. Monitored deliveries and assisted in resolving real-time operational issues. Maintained accuracy and quick response time in a fast-paced support environment.

Customer Support Executive
Aug 2025 - Dec 2025

Teleperformance (Client: Flipkart) | Remote

Handled L2-level escalations for Flipkart customers via social media platforms. Resolved complex issues related to orders, refunds, cancellations, and delivery delays. Coordinated with internal teams to ensure quick resolution, adhering to SLA and TAT policies.

Business Owner
2020 - 2025

Self-employed | India

Managed end-to-end operations including production, sales, inventory, and customer service. Built customer loyalty through consistent service quality and direct problem resolution. Ensured product quality, hygiene standards, and timely delivery for repeat orders.

SELECTED PROJECTS

AgroLens AI
Computer-vision system for crop-disease detection, published as a documented machine-learning project.

E-commerce Analysis
Data preparation, feature engineering, exploratory analysis, visualization, Pandas, and scikit-learn workflows for e-commerce data.

Neural Portfolio
Interactive 3D neural-network portfolio with deterministic navigation, accessible fallbacks, and automatic GitHub project synchronization.

PROFILE

Machine Learning Engineer striving to build impactful AI solutions and solve real-world problems. Experience across modeling, data workflows, customer operations, brand reputation, and autonomous-delivery support.

CORE SKILLS

Data

Python, Pandas, NumPy, SQL, exploratory data analysis, preprocessing

Machine learning

Scikit-learn, XGBoost, regression, classification, feature engineering, model training, validation, error analysis

AI systems

PyTorch, neural networks, language-model exploration, APIs, workflow automation

Product engineering

Next.js, React, Three.js, accessible interaction design, GitHub integration

WORKING STYLE

- Start with the problem and the people it affects.
- Establish useful data and model baselines.
- Evaluate honestly and document decisions.
- Build reliable systems with clear communication.

TECHNICAL FOCUS

- Practical machine learning for real-world problems.
- Reproducible experimentation and thoughtful validation.
- Interfaces that turn AI experiments into useful tools.

CONNECT

Open to machine-learning opportunities, engineering conversations, and thoughtful collaborations.
